

We are looking for franchisees who understand the impact of the Internet on the future of small business.

You don't have to be a "techie!" We teach you everything you need to succeed. We're looking for people skills and a drive to achieve. If you have some of these qualities...

- a sales and marketing background;
- business experience;
- fascination with the Internet and technology;
- a desire to work with people and information; or
- experience in franchising...

...you may have the elements for success with **Cyber Growth Solutions™**!

What is Cyber Growth Solutions™?

Cyber Growth Solutions™ has created a new, dramatic franchise never before seen in franchise history. We have combined former executives of the Domino's Pizza organization with top technology professionals to create the franchise of the future. An aggressive, targeted, and dynamic web presence—built for efficiency and growth—defines the future of today's business. As a **Cyber Growth Solutions™** franchisee, you are at the forefront of this unique technology solution. Using our business model, you provide web presence solutions for your customers.

Cyber Growth Solutions™—High Tech, High Touch

Cyber Growth Solutions™ is a complete Internet business solutions provider. It is the gateway to a complete real-time web presence for small- and medium-sized enterprises (SME's).

Businesses today need a web presence. Cyber Growth Solutions™ powerfully meets that need with our state-of-the-art applications, portal solutions, and personalized content management tools. Our tools provide SME's significant functionality and all the control they need to harness the Internet for their specific business requirements.

Our subscription web-based, completely customizable applications—**Website Mill™**, **Portico™**, **E-Biz Mill™** and **Flash Mill™**—give these SME's the ability to effortlessly manage their e-business initiatives from anywhere, at anytime, from any computer with Internet access. Our design and development teams can create custom applications, streamlining and integrating your business processes, ultimately impacting your bottom line.

Cyber Growth Solutions™ is affordable. Because our applications are web-based, we provide our services without costly software to install, maintain, or support.

What does the franchisee do?

First of all, you don't need to be a "techie"—we teach you what you need to succeed. Our training program shows you how to work directly with your local businesses to determine their complete web-presence needs and solutions. The strength of the Cyber Growth Solutions™ model is the power of our products and the wealth of support available to our franchisees. Our support team includes top technology and business experts with the experience and the resources to propel you forward. We show you how to work with your local businesses, friends, and neighbors to discover their needs—then we do all the customizing and technical work while you retain nearly 80% of revenues earned.

How do I earn revenues?

The strength of the model is also based on recurring revenue through monthly subscriptions—not just one-time fees. We offer our franchisees a Base Territory to sell products and services or an option to expand their Base to a National or Global Territory. Recurring income and territory expansion provide you with excellent growth potential.

Easily affordable

Cyber Growth Solutions™ is not a traditional franchise in many ways, including the low overhead and short lead-time required to start. Franchisees may choose to work from home, and many already own the necessary computers and equipment. For as little as an initial investment of 50K (less if you already have computer equipment), franchisees can open for business within a month. Unlike many other franchises, we do not require a lengthy application or reams of personal information for approval. Without the need for bricks, mortar, or staff, you and Cyber Growth Solutions™ rapidly launch your new business
